Baths! Baths!

HOT, TEMID AND COLD WATER.
Medicated, Vapor and Sulphur Baths, can be had, unsurpassed in quality and convenience by any on the Pacific Coast, at the former Residence of Dr. Wm. H. GOSS.

Cor. of Douglas and View streets.

This elegant Bath House will be open in the future to both LADIES and GENTLEMEN. Ladies' Entrance is on the South side; Gentlemen will be admitted to their Parlor on the West side.

N.B.—No luxury equal to a bath can be procured for FIFTY CENTS. Sulphur and Vapor Baths cost but \$1.

Remember, FIVE EIGHTHS of all we eat should pass through the pores of the skin. Wash and be clean. "Cleanliness is next to godliness." If you would save your pockets from medical taxation, and your bodies from poison drug vexation, BATHS are what you need. He has done or can do, but solicits that share of patronage which the people of an intelligent community may find to their physical and pecuniary interest to bestow after having consulted him.

N.B.—Consultations at the Office FREE.

DR. ZELNER,
a12 1m Office in the Drug Store, cor.

THE BRITISH COLONIST

Saturday Morning, August 16, 1862

Vancouver Island and British Columbia in the International Exhibition.

Mr. Pidwell, Secretary of the International Exhibition Committee, has laid before us a copy of a letter from the Duke of Newcastle to Dr. Lindley, Chief Commissioner at the World's Fair for the exhibition of articles from the Colonies, in which His Grace speaks in the highest terms of the display made by all the English Colonies, and says that "in gold and other metals—in cereal produce—in timber—in wool—above all, in cotton—the visitors of the Exhibition will find the English Colonies eclipsing all competitors;" and adds: "I assure you that, not only officially, but individually, I am delighted at the position before the world which the Colonies have assumed in the exhibition."

Mr. Pidwell has also placed us under obligations for the copy of a letter received from Hon. A. J. Langley, dated London, June 23d. In the course of the letter Mr. Langley regrets that no Prize Essay had reached the Exhibition, and says that to supply in a measure the deficiency, he has had 8000 circulars printed, and trusts some may "fall on good ground." Donald Fraser's letter and the Governor's Blue Books, have aroused all kinds of interest in the colonies. Many emigrants are leaving, and should the accounts of 1862 be favorable, Mr. Langley believes there will be a large emigration next year. The expenditure on account of the Great Exhibition Mr. L. thinks the most profitable that we could have made, and almost renders unnecessary the employment of a lecturer.

The Pocatontas, with the spar from Barclay Sound, had not arrived at date of letter, but sections of a spar from British Columbia had come to hand, and, with the other articles, were on exhibition. The Vancouver spar, when received, will be erected as a standing advertisement in the Royal Horticultural Gardens. The photographs were received and placed on exhibition. Mr. Grier's specimens of gold nuggets are labeled, "A Present from Cariboo"—Three nuggets found and exhibited by Mr. David Grier, a miner in that gold-field. To Mr. Le Broton of the Bank of B. N. A., this colony is indebted for the handsome manner in which the gold is displayed—arranged on shallow trays, and covered with a shallow, strong plate-glass case. Nova Scotia's gold is arranged in bowls, which are placed in a great square case, and comparatively few visitors look at it. British Columbia gold is displayed like ours; that colony sent some fifty different specimens. The expense of fitting up Vancouver's corner in the Industrial Exhibition was £60—considered cheap. A high screen was made, with the back's horns at top, the back underneath, standing on the bird-case, which is surrounded by two steps, and on these are placed the coal, copper, iron, cement, stone, &c. On tables, extending either side of the screen, cereals, small samples of woods, coal, wool, salmon, &c., &c., are arranged. When the Pocatontas arrives, Mr. Langley promises to have a photograph taken of our corner, and thus enable Vancouver Islanders to see "how the four-year old was trotted out." British Columbia birds were badly damaged on the voyage out. Captain Mayne is engaged writing a book on these Colonies. The coals, rounded by water, Sir W. Logan says do not contain fossils; the red stone, marked "iron ore," is pronounced by him to be jasper (no value). The copper ore, from Barclay Sound, it is said would make the fortune of a company if in England; the magnetic ore is valuable. The cereals compare favorably with those in England; but South Australia excels nearly all (67 lbs. some ounces to the bushel). Neither the wool, the cereals, the woods, nor the minerals, have been received in sufficient quantities to claim the report of the jurors—a most unfortunate circumstance. Other countries have about a bushel of each cereal, and other articles in proportion, so that it is feared that our contributions will not be noticed much in print. The exhibition is considered a great success. A notice has been struck up to the effect that owing to the non-arrival of the Pocatontas the bulky goods from Vancouver Island had not come to hand. "The perishable fruit and potatoes, besides being forbidden," Mr. Langley writes, in conclusion, "were decayed and sprouting. The potatoes I divided between Chiswick Gardens and a personal friend. In the garden of the latter they have grown more quickly, and more vigorous looking and higher than others, planted before them. They were flowering a week ago."

ENAMELED LADIES.—We knew that there were enameled jewelry, enameled work-boxes, and enameled parlor ornaments. But we were not prepared to learn that there are such articles as "enameled ladies." Recently a Mrs. Levenson, describing herself as "a ladies' enameler," brought suit, in London, against the Hon. Captain Carnegie, to recover the sum of £958 5s. for work done by plaintiff in enameling defendant's wife. The plaintiff testified that the lady had been afflicted with abscesses in her breast which left scars, and that by reason of an operation performed in Paris, her complexion had much faded. She said that if she could appear in public without a high-necked dress she would give plaintiff £1000. The enameler accordingly performed on the lady's neck, bust, and face, and said the plaintiff proudly, "It made her beautiful forever. Her complexion, when she first came to me, was sallow, and she looked languid; my process made her a beautiful woman—a very beautiful woman. The operation is performed with a liquid, and not with a paint. Ladies often come to me to be enameled—children are also brought. After the process the skin becomes so white that it resembles painting on ivory." The Hon. Capt. Carnegie was put on the stand, and having deposed that the enameling did no good, and that his wife had employed plaintiff without his authority, the jury returned a verdict for defendant. This system of enameling is said to be carried on very extensively in England and on the Continent, and is employed by faded beauties to deceive unsuspecting bachelors whom they desire to entrap as matrimonial partners. Young maidens and married ladies also adopt the process to give them a pale, interesting look and a smooth skin. Enameled ladies, forsooth! Imagine a loving swain seeing for a kiss from his sweetheart, and her reluctant reply, "Well, you may kiss me, but— but—" "But what, my dear?" "Be careful, love, not to crack the enamel!" Suppose one of our young male colonists were to steal a kiss from the ruby lips of an enameled beauty. The effect on the enamel would be equal to the destruction wrought by the bull in the China shop.

It is said that Queen Victoria has once or twice visited the International Exhibition in privacy.

David W. Darling, the Alleged Murderer of Three Men, before the Police Magistrate.

Yesterday morning the Police Court and the approaches leading thereto were crowded by a large and anxious crowd of citizens, assembled to listen to the proceedings in the case of David W. Darling, who stands charged with the murder and robbery of Lewin, Sokolosky, and Reaucher, near the Forks of Quesnelle River, on the 26th of July last. The prisoner, who is about five feet five inches in height, with slight but well-knit form, restless grey eyes, and features indicative of great self-possession and strong will, stood in the dock as unconcerned, apparently, as the most disinterested spectator in the room.

When the case was called, Superintendent Smith was sworn, and testified that from information received by the police it would be proven that the prisoner was seen in company with the three men on the day of their murder; that he was employed to carry their gold dust; and that he was seen to pass along the trail alone two or three hours before the murder. Mr. Smith asked for a remand to enable him to bring forward several necessary witnesses.

The magistrate asked Darling if he wished to make any statement—if so, that he must remember that anything he might say would be used in evidence against him. Darling replied that he was willing to make a statement and would stand to it, five years or fifteen years hence, and proceeded as follows:

DARLING'S STATEMENT.
I left Williams Creek between 5 and 4 o'clock on Thursday afternoon [24th July], and came as far as Antler Creek that night, and stopped all night at Col. May's house. Next morning, at 7 o'clock, I left Antler Creek alone, and after descending the mountain for three or four miles I overhauled several men—three or four of them—some packing gold dust—at least I suppose it was dust. One of them was a Frenchman [Reaucher] and another was an old man packing blankets. The Frenchman was about my size and had a package, which I supposed was gold dust, done up in a gunny sack. I traveled some little distance with them when a sandy-complexioned man [Lewin]—a Jew I suppose—offered me \$15 to carry his dust, which was in saddle-bags, to the Forks of Quesnelle. I told him I would do it, and I carried the bags for him to the mouth of Keithley Creek and delivered them to him. Next morning [the day of the murder] I got up about 6 o'clock, ate my breakfast and went to Beaver Lake alone in one day; from Beaver Lake, on Sunday, I went to Williams Lake, and the following day to Alkali Lake. From Alkali Lake I went to Big Bar Creek, in two days, traveling a while in the night, and from thence I went to Leon's. From Leon's I reached Lillooet Flat and stopped on the opposite side of the river all night. I would wish here to correct myself with regard to the two days' travel. I traveled from Alkali Creek to within eight miles of Big Bar Creek in one day. On the following day, to Leon's, and on the next to Lillooet, and on the following day I crossed one lake and slept in a barn four miles from the portage or steamboat landing. The next night I came to Pemberton, but I don't remember whether I took the steamboat that night or not. I traveled hard, and don't remember. From Pemberton I came across one large lake and one small one, and next day I took the stage to Douglas, where I staid over night, and left there on the following day, and arrived at Queensboro' [New Westminster] the following morning. I have nothing more to say, I believe.

The prisoner then signed his statement, and said he would like to call on the old gentleman (Mr. Cavanagh) to prove that what he said with regard to packing the dust was true. Mr. Cavanagh, it appears, is the old man described in the prisoner's statement as packing blankets. The magistrate said evidence of that nature would be premature at present, but that if the prisoner could furnish proper security, he would be liberated on bail. Darling replied that there were many men in court who knew all about his character; but he was afraid that he could not get bail, and would have to go to jail. He would prefer that the examination should come off at once, for fear that the witnesses would leave town. He also added that he wanted Mr. Steele, for whom he had worked, as a witness.

Mr. Steele said he would be in town in three days, and the magistrate declined to hear any evidence at present.

Darling—Say, look-a-here, Judge, how about the old man? I want him as a witness, too. Magistrate—He shall be taken care of.

Darling—Well, I suppose I'll have to go to prison for three days. But, Judge, there's one thing I wish you'd do.

Magistrate—What's that?

Darling—Why, I've been kept here on dry bread and no sugar in my coffee. I hope, in future, that I shall be better fed, till I'm proved guilty—I don't think it's right to feed me so poorly till I am.

The magistrate advised the prisoner to make application to the proper quarter, and his wants would, no doubt, be attended to.

Darling was then removed to one of the brick cells. He was formerly captain of the sloop Black Hawk, plying between this port and San Juan Island.

The Police magistrate subsequently, upon application of Mr. Bishop, who has been retained to watch the case for the prisoner, consented to liberate the accused on bonds of two sureties of £500 each and himself in £1000; but up to last night we heard of no responsible party coming forward to go his bail. Upon application of Mr. Bishop the privilege of having meals sent the prisoner from the restaurant has been accorded him.

A SAD STORY.—The San Francisco Herald of August 7th says: Among the passengers on the Golden Gate was Geo. O. McMullen, of the late firm of Verplanck & McMullen, of this city, who had closed up the business here and left with his family, intending to end his days in his old home at the east. He was back here last night, bereft of all—wife, children, and fortune gone at a single blow.

OUTRAGES.—A dispatch received at San Francisco from New York, dated August 7th, says: "Send all treasure remittances with the war risks;" which would seem to indicate that there is some truth in the report that the rebel iron-clad gunboats, built in England for the Southern Confederacy, had arrived at Mobile.

Auction.—Mr. McCrea will hold an auction sale of furniture, britania ware, etc., at 11 o'clock this morning, at salesroom.

SUPREME COURT.—This Court was occupied again yesterday in hearing the suit of Anderson vs. Williamson and Jeffery. The case will probably last two or three days.

STATE OF IDAHO.—It is proposed to petition the U. S. Congress to create the district in which the Salmon river mines are located into a new State to be called Idaho—Indian for "Gem of the Mountains."

ARRIVALS.—The bark Fremont and ship Amethyst arrived yesterday morning at Esquimalt, from San Francisco, with hay and live stock. The Fremont discharged cargo yesterday.

FROM FRASER RIVER.—The steamer Enterprise arrived last evening with 46 passengers. There is nothing later from Cariboo. It is rumored that a man, on whose person was found a bag of gold dust marked with the name of one of the murdered men, has been arrested at Douglas.

SAILORS TRIED, CONVICTED AND SENTENCED.—Eight sailors, tried by a court-martial on the Bachelante and convicted of desertion, were yesterday sentenced to ninety days imprisonment with hard labor, and brought to jail yesterday evening. Seven more deserters are expected to-morrow. The tars seem quite jolly under the circumstances.

RUNAWAY.—Mansell & Co.'s butcher-cart was whirled away from their shop yesterday by the spirited animal attached, and upset on Bastion street. The driver was thrown off, but came out lucky with a few bruises. The horse scratched himself just enough to learn him better than to run away again, and the wagon received but little injury.

THE HUSTINGS.—Sheriff Naylor has caused to be erected a large stand at the northern extremity of his office, over which the various candidates for Mayor and Councillors may spread themselves, and from which they may try the strength of their lungs in enunciating the principles which each proposes to advocate if elected. A rare entertainment may be expected.

Light is dear in Dixie. Terebene oil, a substitute for our cheap fuel, which is made of resin and turpentine, is sold for one dollar and seventy-five cents a gallon.

DR. JOHNSON'S WOOING.—When Dr. Johnson courted Mrs. Potter whom he afterwards married, he told her he was of mean extraction, that he had no money, and that he had had an uncle hanged. The lady, by way of reducing herself to an equality with the doctor, replied that she had no more money than himself, and that, although she had not had a relation hanged, she had fifty who deserved hanging. And thus was accomplished this very curious affair.

Everybody knows the story of the Quaker in his rig, confronted in a lane where it was impossible for two carriages to pass, by an obstinate fellow in a one-horse chaise. The Quaker mildly declined to back his horse—the obstinate fellow swore he would not. After an hour or so of ineffectual discussion, the man in the chaise thought to crush the Quaker into submission by taking a newspaper and calmly perusing it. "Friend," said the Quaker, "when thou hast finished thy paper I trust thou wilt lend it to me." The man was beaten, and backed his horse without more ado.

RUNNING THE BLOCKADE.—A very fine steamer, named the Keronese, is now lying in the Butte Docks, loading with coal, destined for the Southern ports. She is to run the blockade, or at least attempt it, and is manned by a very smart crew of picked hands. She will sail from Cardiff in a few days. Two steamers lately cleared out for Nassau, valued with cargoes at £160,000, were insured at Lloyd's, at war risks—the steamers at seven and eight guineas premium, and a like sum on the cargoes above the ordinary sea rates of 25s. On the 3d the rates advanced to nine and ten guineas, arising from the vigilance now pursued by the blockading squadron of the Federal forces. It is said that the squadron have possession of the names of all steamers on which war risks have been effected in England, which, on doubt, is furnished every mail by parties in the city.—European Times.

A SPANISH PARRICIDE.—A horrible parricide has just been committed at Almaden, in Spain, by a farmer named Lopez. The father of this man having recently contracted a second marriage, the son, thinking his interests compromised, was seized with a feeling of bitter hatred, and resolved on revenging himself. A few days ago, after sending his wife on an errand at some distance, he armed himself with a sickle, and, proceeding to a field where his father was at work, murdered him by blows on the head, and then disfigured the body by chopping the extremities to pieces. Lopez then returned home and supped, and slept as usual, and it was only on the following day, after the report of the murder had spread abroad, that his wife had her suspicions awakened by discovering blood on her husband's clothes. He was subsequently arrested. On being interrogated he confessed his crime, and disclosed all the details with brutal coolness and cynicism.

THE FRENCH FINANCES.—The Paris correspondent of the Morning Herald, writing on the 4th, says: "The Budget Committee have at length laid their report before the Corps Legislatif, but some days must elapse before it is printed and distributed. I am, however, in a position to state its principal features. The commission labored hard to obtain from the Government a reduction of the army below the estimate (400,000 men and 85,000 horses), and even had an interview with the Emperor on the subject, but His Majesty explicitly declared that he would not consent to a further reduction on any condition. The Committee of the Corps Legislatif were too polite to insist any further. On the other hand the Committee have totally upset M. Fould's budget, and what is stranger still have obtained the consent of the Government to the various modifications they propose. The proposed tax on salt is abandoned—the exemption proposed for small tax payers is abandoned—the proposed stamp duty on bills and receipts is abandoned—the proposed duty on carts and waggons is greatly reduced, but the tax on private carriages is maintained. In round numbers the Budget Committee have struck off some 30,000,000fr. from M. Fould's estimated receipts; but they have not apparently retrenched one centime from his estimated expenditure. The various departments must therefore economise, or the deficit which M. Fould fancied he had provided against, must add its quota to the deficits of the past ten years, which amount, as you are aware, to the respectable figure of £10,000,000 sterling.

THE BALLOT.—The Times thus states the circumstances under which Mr. Berkeley succeeded in carrying his ballot motion in the House of Commons, on the 27th.—When Mr. Berkeley who had taken a position in the front Opposition bench, rose to speak, the Speaker left the House for a few minutes. There were scarcely forty members in the house; the Opposition benches were almost deserted, and Mr. Brand and Mr. Hoggess were in undisputed possession of the Treasury Bench. Frequent communications passed between Mr. Berkeley and the hon. members below the gangway, who began to muster in some strength. It was plain that some skilful manoeuvre was in contemplation. When the Speaker again took the chair, Mr. Berkeley said he had to ask leave to bring in a bill to cause votes at elections to be taken by ballot. It struck him forcibly that the arguments he had heretofore used were entirely unanswerable, and under those circumstances he begged to leave the question in the hands of the right hon. gentleman in the chair. [Cheers and laughter.] Lord Farnham seconded the motion. The question having been put, was received with a vigorous cry of 'Aye' from the one side, and a sturdy 'No' from a few voices on the other, and when the Speaker declared the 'Ayes' had it, there were loud cheers mingled with bursts of laughter from below the gangway. In the meantime Lord Palmerston entered the House, and was about to speak, but the 'Noes' had just been given, and the noble Lord was too late. A division was called for, and nearly 100 members hurried into the House. The House then divided. When the hon. member from Bristol, as one of the tellers, walked from the table to the lobby, he was greeted with much cheering, which was renewed when he took the paper from the clerk in order to announce the numbers.—For the motion 83; against it 50; majority 33. The announcement of the numbers elicited much cheering and laughter.

A FRENCH FIRE-KING.—A curious exhibition takes place every evening at the corner of the Rue Villo Just and the Avenue de St. Cloud. In a small field there is situated a wooden house, covered with pitch and other combustible matters, which is erected daily, and set fire to at about eight o'clock each evening. The flames in a few moments reach a gigantic height; and when they are most ardent, a man jumps into the midst of them, rolls about, and pulls down blazing rafters, which he carries away. This salamander can stay in the fire from five to seven minutes. When he comes out the clothes which enable him to do so smoke like a steam engine; they are said to be made of asbestos covered with sponges freshly imbued in some chemical preparation.—Paris Letter.

An English paper laments that a horrible tendency of British parents to murder their children is on the increase.

DR. HOSTETTER'S STOMACH BITTERS should be in the possession of everybody in the mining region. As a preventive of various dangerous diseases to which the gold seeker is liable, it has no superior. While it is quite palatable even as a beverage, it is speedily and powerfully in its effects upon the system. In all cases of Diarrhoea, Dysentery and the prevailing fevers consequent upon exposure, the Bitters will be found invaluable as a corrective. No man should enter upon the exposed camp life of a miner without being provided with Hostetter's preventive of stomach disease, nor should any of those who are now engaged in the occupation, fail to have recourse to the Bitters.
W. H. OLIVER, Agent for Victoria.

HOLLOWAY'S PILLS are undeniably the finest medicine in the world for Biliousness and Indigestion. In all cases of deranged stomach, determination of blood to the head, bile, sick headache, liver and stomach complaints, there is no medicine known that will give such immediate relief as these renowned Pills; young and old, rich or poor, patronise them, and so many cures are effected by their use, that their praise is sounded from the temperate climate to the frigid zone; in truth, persons who travel consider them a necessary requisite. During the overland journey to India, the blood becomes overheated, the liver torpid, the skin covered with prickly heat, and the whole system languid and exhausted. Nothing so soon gives relief as Holloway's Pills.

ASTHMA.—From Rev. D. Letts, Frankfort, Ill.: "An old lady of our acquaintance has been greatly afflicted with Asthma for many years, and has tried a multiplicity of prescriptions, with little or no effect. My wife sent her a part of a box of the 'Bronchial Troches,'—after a few days we heard that she found great relief from their use, and to-day she sent a messenger some five miles to procure more; we had only one box left, but could not refuse it." "Brown's Bronchial Troches," or Cough Lozenges, are sold throughout the United States.

Sold by CURTIS & MOORE and LANGLEY BROS

To the Electors of Victoria.

GENTLEMEN.—Believing that my business will not enable me to devote that time to the Council which is necessary, I beg to state that I retire from the present contest. To those Gentlemen who offered me their support I tender my best thanks.
Yours, truly,
W. B. SMITH, au15

VICTORIA, August 14th, 1862.

To the Electors of the City of Victoria:

GENTLEMEN.—I beg to offer myself as a candidate for the representation of Yates street Ward in your City Council. I have no personal ambition to gratify beyond so much as is involved in the sincere desire, as a citizen of Victoria, to benefit that City and the Colony at large.
I am honored by your suffrages, I pledge my best exertions to promote the general interests of the community.
I have the honor to be, gentlemen,
Your most obedient servant,
G. E. DENNES.

Tickets obtained at the Box Office.

CARD.

SIR.—In order to counteract a report which has been circulated, that I am not qualified for admission to the bar as an Attorney, I append an extract from a despatch from His Grace the Duke of Newcastle, to His Excellency Governor Douglas, in reply to my petition to Her Majesty the Queen, which was signed by upwards of 100 of the leading inhabitants of Victoria, upwards of 20 Writers to the Signet, and Solicitors, before the Supreme Courts of Scotland, the Members of Parliament for my native City, Edinburgh, and forwarded by the Lord Advocate, first law officer of the Crown for Scotland, and representative of the Scotch Bar in the House of Commons:
[Copy No. 85.]
DOWNTOWN STREET, 7th February, 1862.
TO GOVERNOR DOUGLAS, C. B.
SIR.—I have received your despatch No. 74 of the 7th of December, 1861, in relation to the admission of Mr. COPLAND, who has qualified himself by STUDY IN SCOTLAND, FOR PRACTICE AS WRITER TO THE SIGNET.
I have, &c., "NEWCASTLE."

I have further to add that upon my arrival here in December, 1859, I applied for admission to the Bar, producing at the same time my certificate of 5 years clerkship to James Duncan, Esq., Writer to the Signet, and also Certificate of Examination by the Professor of Scotch Law in the University of Edinburgh. In January, 1859, I sent my first Petition to Her Majesty, through this Government, (which document I believe never reached England, as I heard of it afterwards.) In January, 1861, I sent a second Petition, and in July, 1861, I forwarded a third Petition, in duplicate, that is one copy through this Government, and the other through the influential parties above mentioned. The despatch of the 7th February has now been in these Government offices for upwards of three months, and, as my legal rights have not yet been accorded to me, it will shortly be my duty to make a fourth appeal to my Queen.

JOHN COPLAND.

DOUGALL & SON,
Caledonia Iron Works, Indian Reserve.

CAUTION TO OUR NUMEROUS
Friends for their liberal patronage, and deter-
mined to keep labor in the Colony, we are constantly
making additions to our extensive works in pattern
and machinery, with a powerful steam hammer,
steam shearing engine, and punching engine, along
with three self-acting lathes, and one large, iron
planing machine, which are the very best machines
on the Pacific coast, manufactured by Whitworth,
of Manchester. These powerful machines enable us to
execute the largest machine, smith and boiler work
that is required in these Colonies.
We are the only manufacturers of
Cameron's Improved Turban Water-Wheel,
Which is the best ever constructed, comprising cheap-
ness with compactness and durability. We attach
them to Muley and Circular Saw-mills. A ten-horse
power mill can be packed to any part of the mines.
The largest piece not exceeding 100 pounds weight.
A continuance of public patronage is respectfully
solicited.

DR. J. COLLIS BROWN'S
Chlorodyne.
CHOLERA, DYSENTERY, DIARRHOEA,
CHAMP, AGUE, FEVER, RHEUMA-
TISM, CONSUMPTION, ASTHMA,
COUGHS, &c.
ALL PAIN, VOMITING AND DISTRESS
arises in a few minutes after taking a dose of
this wonderful REMEDY. ANTI-SPAS-
modic remedy, discovered by J. Collis Brown,
M.D. S. L. (ex-Army Med. Staff), the recipe of which
was confided solely to J. T. DAVENPORT, 33 Great Rus-
sell street, Bloomsbury-square, London (Pharmaceu-
tical Chemist). The medical testimony of civil, hospi-
tal, military and naval practitioners pronounces it
INVALUABLE. It relieves pain of any kind, soothes
the restlessness of fever, and imparts the most re-
freshing sleep without producing or leaving any of
the unpleasant effects of opium.
As a proof of its efficacy, a few extracts from nu-
merous Testimonials by Physicians and Surgeons are
given:
From W. Verulius Pettigrew, M.D., Hon. F.R.C.S.,
England, formerly Lecturer upon Anatomy and
Physiology at St. George's School of Medicine: "I
have used J. Collis Brown's Chlorodyne in many
other diseases, and am most perfectly satisfied with
the results."
Dr. Gibbon, Army Medical Staff, Calcutta: "Two
doses completely cured cholera."
From C. R. Vidout, Esq., Surgeon, Egham: "As
an antispasmodic in severe diarrhoea and an antispas-
modic in Colic and Cramps in the Abdomen, the re-
sult is instantaneous."
Extracts from the General Board of Health,
London, as to its efficacy in Cholera.
1st Stage of Preliminary:—In this stage the remedy
acts as a charm, and cures the cholera.
2nd Stage, or that of Vomiting and Purging:—In
this stage the remedy possesses great power, more
than any other we are acquainted with, two or three
doses being sufficient.
3rd Stage, or Collapse:—In all cases restoring the
pulse. So strongly are we convinced of the immense
value of this remedy, that we cannot too forcibly
urge its use in all cases.
From A. Montgomery, Esq., Late Inspector of Hos-
pitals, Bombay: "Chlorodyne is a most valuable
remedy in Neuralgia, Asthma and Dysentery." To
have used J. Collis Brown's Chlorodyne in the above
months' severe suffering, and when all other medi-
cines had failed."
CAUTION: In consequence of the extraordinary
efficacy of this remedy, several unprincipled parties
have been induced to vend imitations. Never be
tempted to buy Chlorodyne, except in sealed bottles,
having the Government stamp, with the words "J.
T. DAVENPORT'S Chlorodyne." engraved thereon.
A sheet full of medical testimonials accompanies
each bottle. Sole manufacturer, J. T. DAVENPORT,
33 Great Russell Street, Bloomsbury, London. Sold
in bottles, 2s. 6d. and 4s. 6d.

DR. J. COLLIS BROWN'S
Chlorodyne.
CHOLERA, DYSENTERY, DIARRHOEA,
CHAMP, AGUE, FEVER, RHEUMA-
TISM, CONSUMPTION, ASTHMA,
COUGHS, &c.
ALL PAIN, VOMITING AND DISTRESS
arises in a few minutes after taking a dose of
this wonderful REMEDY. ANTI-SPAS-
modic remedy, discovered by J. Collis Brown,
M.D. S. L. (ex-Army Med. Staff), the recipe of which
was confided solely to J. T. DAVENPORT, 33 Great Rus-
sell street, Bloomsbury-square, London (Pharmaceu-
tical Chemist). The medical testimony of civil, hospi-
tal, military and naval practitioners pronounces it
INVALUABLE. It relieves pain of any kind, soothes
the restlessness of fever, and imparts the most re-
freshing sleep without producing or leaving any of
the unpleasant effects of opium.
As a proof of its efficacy, a few extracts from nu-
merous Testimonials by Physicians and Surgeons are
given:
From W. Verulius Pettigrew, M.D., Hon. F.R.C.S.,
England, formerly Lecturer upon Anatomy and
Physiology at St. George's School of Medicine: "I
have used J. Collis Brown's Chlorodyne in many
other diseases, and am most perfectly satisfied with
the results."
Dr. Gibbon, Army Medical Staff, Calcutta: "Two
doses completely cured cholera."
From C. R. Vidout, Esq., Surgeon, Egham: "As
an antispasmodic in severe diarrhoea and an antispas-
modic in Colic and Cramps in the Abdomen, the re-
sult is instantaneous."
Extracts from the General Board of Health,
London, as to its efficacy in Cholera.
1st Stage of Preliminary:—In this stage the remedy
acts as a charm, and cures the cholera.
2nd Stage, or that of Vomiting and Purging:—In
this stage the remedy possesses great power, more
than any other we are acquainted with, two or three
doses being sufficient.
3rd Stage, or Collapse:—In all cases restoring the
pulse. So strongly are we convinced of the immense
value of this remedy, that we cannot too forcibly
urge its use in all cases.
From A. Montgomery, Esq., Late Inspector of Hos-
pitals, Bombay: "Chlorodyne is a most valuable
remedy in Neuralgia, Asthma and Dysentery." To
have used J. Collis Brown's Chlorodyne in the above
months' severe suffering, and when all other medi-
cines had failed."
CAUTION: In consequence of the extraordinary
efficacy of this remedy, several unprincipled parties
have been induced to vend imitations. Never be
tempted to buy Chlorodyne, except in sealed bottles,
having the Government stamp, with the words "J.
T. DAVENPORT'S Chlorodyne." engraved thereon.
A sheet full of medical testimonials accompanies
each bottle. Sole manufacturer, J. T. DAVENPORT,
33 Great Russell Street, Bloomsbury, London. Sold
in bottles, 2s. 6d. and 4s. 6d.
